Explanation

A tougher one for the Novices to finish on! The first “3” lures you up the second yellow on the left, to pick up the 3 of GL43 numbering, but it is in fact the road number which you join soon after leaving TC17. You will then be disappointed if you look for a “40”, as it is the “4” and then the letter “o” up the first yellow on the left. 1, 26 and 10 are all road numbers. And the clubhouse avoid is to take you to the B10 via the yellow rather than immediately back on to the A1 around the triangle at the A26 junction.

It’s the same numbers for the Experts, though in a string, and with the letter “o” hidden even more as a number. And Experts don’t get the CH avoid. They may be tempted back on to the A1 by the “1” after the “6” but then they have nothing for the “0” (though the “o” in Solitude Park looks tempting!). The B10 numbering is quite a long way away but once that is spotted the A1 must be avoided after the A26 even though it would be a shorter route, as the instruction would have to include another “1” for the second visit to the A1. Which means taking the yellow linking the A26 to the B10, and on to the finish at TC18. Which will also be the start of Leg 3!
