LEG 3

TC20 to TC21

Novice

TC 20 (137423→NE) to TC 21 (187426)

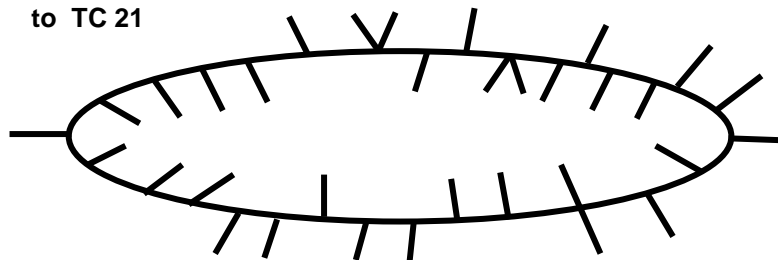

AR

Expert

TC 20 (137423→NE) to TC 21

AR

Explanation

Herringbones for both classes, a straight one for the Novices, and circular for the Experts. Both are 'all roads' and the main area of difficulty is spotting all of the side roads, some of which are not at all obvious.

The correct route also includes a small white loop where the route crosses GL16. This is in the string of 4 consecutive missed lefts with both the exit off the main road, and re-joining the main road, being a 'missed left'.

Experts have to find the start point in their circular herringbone. Looking at the map you see that the section starts with miss a left, miss a right, and miss another left before coming to a crossroads. That combination exists on the circular herringbone starting just above 3 o'clock and going clockwise. That works until the fifth junction after the XSO where there should be another cross roads and not just a 'miss a right'.

Another look at the herringbone and there is another possible starting point, at a wide 1 o'clock and going anti-clockwise.

With this starting point a second cross roads falls nicely into place and a complete route emerges if you spot all of the little side roads.

Including this one!
